Nashville, Tennessee

"MUSIC CITY"

Join some of the world's experts in the brazing of carbon steel, stainless steel, brass & aluminum in the

"MUSIC CITY".

This two-and-a-half-day event will cover brazing fundamentals, filler metals, joint design, troubleshooting, and the new AIAG CQI-29 -Brazing Special Process Assessment with a presentation from Co-Chairman and Abbott's head of Research & Development, Dr. Steve Feldbauer, Ph.D.

This symposium is ideal for brazing engineers, product designers, maintenance personnel, and anyone involved in the production of brazed components.

This symposium is excellent opportunity for beginners and experienced employees to learn from the experts in the areas of:

- Furnace Brazing
- CQI-29
- Continuous Furnace Maintenance
- Atmosphere Control
- Wire Mesh Belts
- Furnace Optimization
- Furnace Safety
- Troubleshooting
- Filler Metals
- Fundamentals
- Joint Design
- Aluminum Brazing
- Filler Metals & Fluxes
- Aluminum Core Building
- Aluminum Brazing Furnaces
